The object in issuing this series of Musical Booklets is threefold:—

1. To introduce to musical students and amateurs generally certain branches of the art of which they may have little or no knowledge, and, by so doing, enlarge their musical sympathies and interest.
2. To provide "systems" or "aids" for musical students in their studies.
3. To produce concise information which will be useful for reference.

A further object might be added, viz.:—

To arouse interest in various subjects connected with music, in order to lead students to desire further knowledge, which can be obtained from the various text-books already published.
